Business Analyst | Requirements & Process Analysis | Project & Product Management | Reporting & Analytics

Summary

Business Analyst with 3+ years of experience in **requirements elicitation, process mapping, and reporting automation** across insurance and enterprise client operations. Skilled in translating ambiguous business problems into **structured requirements, user stories, and acceptance criteria** while building SQL, Python, and BI solutions that cut manual effort. Experienced running stakeholder discovery, supporting **UAT and data validation**, and owning documentation that keeps cross-functional teams aligned. Proficient in **SQL, Python, Advanced Excel, Power BI, Tableau, JIRA, SharePoint, and Agile delivery**.

Education

University of California, Riverside — Riverside, CA
Master of Science in Business Analytics — *Sept 2024 – Dec 2025*

Guru Gobind Singh Indraprastha University — New Delhi, India
B.B.A. Banking and Insurance — *Nov 2020 – Aug 2023*

Experience

Business Analyst — Dec 2025 – Present
Intelty, Inc. — *Anaheim, CA*

- Leading **discovery sessions with 7+ business stakeholders**, translating ambiguous operational problems into structured requirements and workflow solutions.
- Automating 4+ reporting dashboards in **SQL, Python, Power BI, and Tableau** for **enterprise real estate clients including Keller Williams and Cushman & Wakefield**, cutting manual reporting effort by roughly 7 hours per week.
- Running **data validation and root cause analysis** on reporting discrepancies, resolving 10+ recurring data quality issues and improving dashboard adoption.

Data Operations Analyst — Oct 2025 – Dec 2025
University of California, Riverside — *Riverside, CA*

- Analyzed cross-functional processes across 4 departments to identify workflow gaps, delivering recommendations that informed process redesign.
- Built 3 interactive **SQL, Excel, and Power BI** dashboards surfacing reporting KPIs and improving cross-group data consistency.
- Partnered with department leads to **standardize reporting definitions across 5 data sources**, cutting downstream discrepancies.

Risk Analyst — Aug 2023 – Aug 2024
A&M Insurance Broker Pvt. Ltd. — *New Delhi, India*

- Managed operational workflows across **500+ client accounts** for a portfolio of **enterprise real estate developers including DLF, Godrej Properties, Lodha Group, Oberoi Realty, Sobha, Prestige, Brigade, and Embassy Group**, resolving data discrepancies to ensure accurate, timely delivery.
- Analyzed customer and policy data in **Advanced Excel** to uncover process inefficiencies, reducing manual processing effort by 20%.
- Served as primary escalation point for data quality issues, closing roughly **18 escalations per month** before they reached clients.

Business Analyst — May 2021 – Jul 2023
Venus (I) Enterprises Ltd. — *New Delhi, India*

- Gathered and documented **business requirements** through interviews with 6 stakeholders across **chemical manufacturing operations**, translating needs into actionable specifications.
- Recommended and implemented workflow enhancements that increased adoption of new business processes across 3 teams.
- Maintained requirements docs and process maps as a single source of truth, reducing rework between business and technical teams.

Projects

SQL Data Incident Investigator
SQL, Python, R

- **Problem:** data teams re-derive why a metric broke because incident knowledge lives in one engineer's head. **Solution:** built an investigation workbench with **5 case files** running live SQL over in-memory datasets — JOIN fanout, missing DISTINCT, timezone mismatch, and silent load failures.
- **Impact:** converts root cause analysis into a repeatable path, adding freshness and null-rate observability plus **z-score and IQR anomaly detection**, and auto-generating a post-incident report per case so the fix is documented rather than re-explained.

Profit Intelligence
SQL, Power BI, Excel

- **Problem:** revenue is visible everywhere but profit drivers stay hidden until margin has already eroded. **Solution:** built an executive dashboard connecting discounting, returns, channel mix, and retention into one filterable surface with **8 KPI scorecards**.
- **Impact:** isolates margin leakage by segment and category through **cohort retention heatmaps** and click-to-cross-filter channel and region analysis, with a discount-rate simulator that recalculates projected net profit live so pricing changes are tested before they are made.

DecisionCraft
Python, SQL, R

- **Problem:** dashboards fire alerts constantly, but almost none produce an actual decision. **Solution:** built a **5-step workflow** taking a raw signal through P0–P3 severity classification, waterfall diagnosis, and a 3-hypothesis root cause tree backed by SQL evidence queries.
- **Impact:** turns analysis into an auditable outcome — a **weighted tradeoff matrix across 5 criteria** re-ranks options live as assumptions change, auto-generating a decision record carrying owner, rationale, success metrics, and escalation path.

Skills & Certifications

Business Analysis: Requirements elicitation, user stories and acceptance criteria, process mapping, gap analysis, stakeholder interviews, UAT support
Data & Analysis: SQL, Python, R, Advanced Excel (PivotTables, Power Query, XLOOKUP), data validation, root cause analysis, source reconciliation
BI & Reporting: Power BI, Tableau, dashboard development, KPI design, cohort and trend analysis, executive reporting
Delivery & Tools: JIRA, SharePoint, Agile and waterfall delivery, workflow automation, process improvement, vendor collaboration
Certifications: Google Data Analytics Professional Certificate; AI Business Solutions in LLM Applications; AI Fluency and Frameworks; Introduction to Generative AI; Claude 101
